

Report Changes | Covid-19, Status Summary (Map and Table)

The Status Summary Report (and Map) has been updated to provide a more appropriate snapshot of key information collected, including information previously held in the Covid-19 report. The Covid-19 specific report will therefore be decommissioned as a standalone report.

To view details on the changes, please click [here](#)

Information that will be taken from the Covid-19 Report and merged into the Status Summary Report include:

1. Total CV-19 Residents
2. CV-19 Symptomatic/Confirmed (today)
3. Locations with ≥ 0 cases
4. Occupancy %
5. Infection Rate %
6. Minimum cases

More Detail on User Registration Page

Job role type has now been added to the Capacity Tracker. This information will help us to improve the usability, training and support to all Capacity Tracker users in the right way.

When registering, new users will be asked to select a 'Job Role Type', as shown in the screenshot below (users from a care provider organisation will have this selected by default).

The screenshot shows the 'Register' page with the following fields and options:

- Home icon, Register, Help
- Register New account
- Your Details » Organisation Details » Finished
- Email Address:
- Full Name:
- Contact Number:
- Job Title:
- Job Role Type:
- User Type: Standard Approver. Note: Select 'Approver' if you require permission to approve other users in your own organisation.
- Provider Type:

Care Home	NHS Acute	Community	Substance Misuse	Hospice	Home Care
Sub ICB	Local Authority	Local Authority (Regional / LRF)	NHSE/DOH & CSU	GP	Other
Search Only	Aggregate Only				
- Navigation: < Previous, Next >

16.08.2022

Current users will be prompted to include their job role type the next time they log on to the system, as shown in the screenshot below. Users should select the one item from the list that most closely describes their job role.

You are required to select a Job Role Type before continuing
